

Start Every Patient with the EXXUA 14-Day Titration Pack

Purpose

- Helps patients initiate EXXUA therapy

What's in the Titration Pack?

- Each titration pack contains 32 tablets of the 18.2 mg dosage strength
- Patients should follow the recommended titration schedule provided below

E-Prescribing Tips

- Select: "EXXUA Titration Pack – 14-day titration"
- Quantity: **1 pack**
- Refills: **0** (patients move to 30-count bottle after titration)

INITIATION

14-DAY TITRATION PACK

Advise patients to swallow EXXUA whole and not to split, chew, or crush the tablets, as well as to take EXXUA at approximately the same time every day with food.¹

See Full Prescribing Information for dose modifications for patients with renal or hepatic impairment or concomitant use of CYP3A4 inhibitors.

Tablets not actual size.

IMPORTANT SAFETY INFORMATION

WARNING: SUICIDAL THOUGHTS AND BEHAVIORS

Antidepressants increase the risk of suicidal thoughts and behaviors in pediatric and young adult patients in short-term studies. Closely monitor all antidepressant-treated patients for clinical worsening and emergence of suicidal thoughts and behaviors. EXXUA is not approved for use in pediatric patients.

INDICATION

EXXUA is indicated for the treatment of major depressive disorder (MDD) in adults.

Please see enclosed Full Prescribing Information for EXXUA.

Eligible patients **may pay as little as \$0**
at Aytu RxConnect pharmacies*

OPTIMIZATION

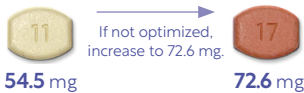

At Day 15: Move to a 30-Count Maintenance Prescription

MONTHLY Rx

OPTIMAL DOSE†

DAYS 15 & BEYOND

1 tablet,
once per day

†In pivotal studies, approximately 86% of patients were titrated to an optimal dose of 54.5 mg or 72.6 mg

Tablets not actual size.

Once the patient completes the Titration Pack, prescribe the ongoing maintenance dose.

Maintenance Prescription
Select the following:

- 18.2 mg
- 36.3 mg
- 54.5 mg
- 72.6 mg

- 30-count bottle
- 1 tablet once daily
